

# Our Policy for the Environment

**We operate**

with respect and care for the Environment in accordance with the highest applicable standards and regulations.

**promote**

a Sustainable Development through an effective policy of renewable energy use from water, wind and sun.

**privilege**

energy efficiency through a careful production and distribution process.

**preserve**

the Environment through a responsible use of renewable energy sources.

**increase**

generation and distribution capacity from water, wind and solar sources (water, wind and sun).

**use**

the Best Available Technologies to optimize our business process and improve our environmental performances.

**grant**

the prevention and reduction of the environmental impacts related to our activities.

**act**

in accordance with our Quality and Health & Safety policies.

**communicate**

the environmental and performance indicators to all stakeholders, encouraging their full and proactive involvement.

**use**

tools and processes for an effective environmental management system according to our ISO and EMAS certifications requirements.
